回收紗織帶 *Recycled Ribbon*

榮樹致力於保護環境、環保和永續生命。

我們與 GRS 認證紗線供應商合作，使用寶特瓶開發出用回收紗織成的回收織帶。由世界各地收集而來的寶特瓶，經過徹底的清潔，再分解成更小的塑膠粒子。塑膠粒子經由熔融為液態，轉化為纖維。將這些長纖維聚合在一起成為 100% 可回收的紗線，並使用無毒無害的水性印刷。以環境可永續發展為目標，期許降低對海洋生物的破壞。是對環境友善的首選織帶。

At Rong Shu, we are committed to the environment protection and the preservation of the natural life. We have partnered with the GRS certified yarn supplier to develop sustainable ribbons that are woven with yarns made by post-consumer waste, the well-known plastic bottles. The used plastic bottles that we use for our recycled ribbons are collected via various recycling points throughout The World. These bottles are then thoroughly cleaned for hygienic purposes and are then broken down into smaller plastic elements. These plastic flakes are melted back into a liquid form then converted into filaments. A number of filaments are then combined together and spun to create a 100% recycled ribbon yarn. 5,000m of 25mm satin uses 600 recycled bottles, which are not going to waste, landfill or damage the wider environment.
